The Everglades

Nineteen million years ago, the places we know as the Florida Keys and the Everglades Florida Bay were born. Over time, these naturally-formed wonders developed and blossomed. They continue to do so today.

We invite you to explore this pristine paradise with us by boat, on a crystal clear bay only 5 feet deep or less (no seasickness).

Climb aboard, and be on your way to a place few people ever get to see and experience, southern Florida's breathtaking backcountry.

Combining the thrill of rafting and the sheer pleasure of being so close to nature, you will speed across Florida Bay with one of our experienced nature guides at the helm. An incredible voyage with a flexible itinerary that may change as often as nature itself.

During your tour, you may encounter endangered species such as the Florida Manatee and occasionally the American Bald Eagle. Discover Pygmy Seahorses and hidden sponge nurseries.

Keep a close eye out for the stunning pink plumage of the Roseate Spoonbill, or listen to the cry of an Osprey as it dives for fish.

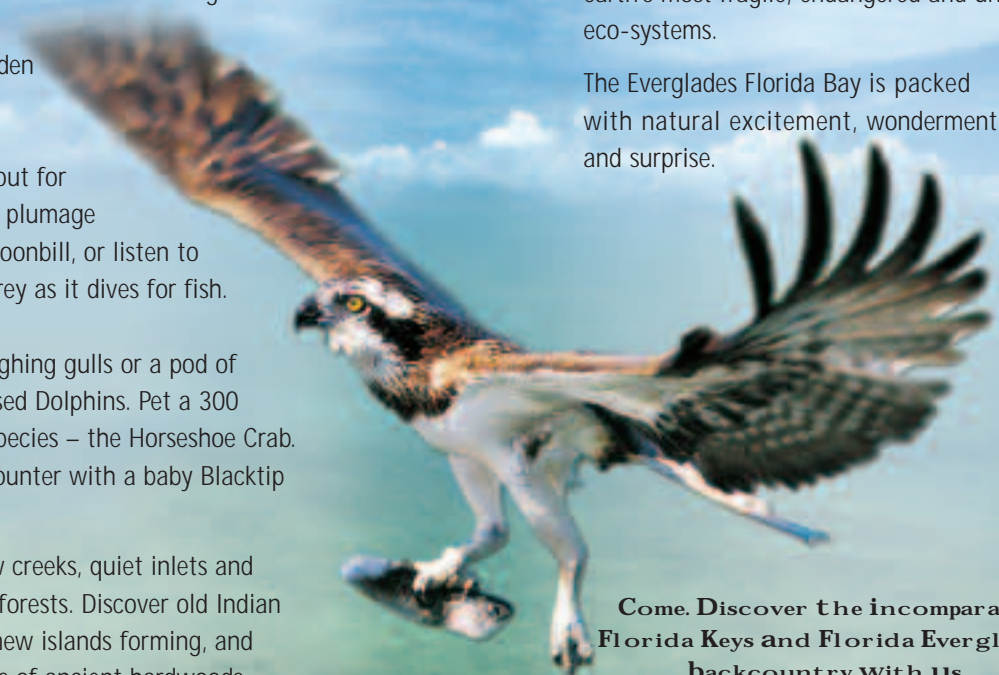

Spot flocks of laughing gulls or a pod of playful Bottle-nosed Dolphins. Pet a 300 million year old species – the Horseshoe Crab. Have a shark encounter with a baby Blacktip or Bonnethead!

Float past shallow creeks, quiet inlets and unruly mangrove forests. Discover old Indian canoe trails, see new islands forming, and explore hammocks of ancient hardwoods.

Bring your classroom outdoors. Customized Enviro-Tours for groups of seven or more available upon request.

Let us introduce you to what environmentalists the world over consider to be one of the earth's most fragile, endangered and unique eco-systems.

The Everglades Florida Bay is packed with natural excitement, wonderment and surprise.

Come. Discover the incomparable Florida Keys and Florida Everglades backcountry with us. a tour unlike any other.
